Group Challenge

Group Challenge

- In this group challenge, we will divide into small groups of approximate 2 to 3 students in each group.
- Each group will work together to solve the challenge question.
- You will spend about 30 minutes for the challenge and then each group will present their answer by screen sharing.
- The goal of this challenge is to enhance your skills in coding, research, problem solving, team collaboration and presentation.
- Codepen link is provided for this challenge. Please fork before making any code changes.

  https://codepen.io/rloke/pen/VwzydKJ

- You are only required to work on the JS window. You do not need to change or add anything in the HTML and CSS windows.

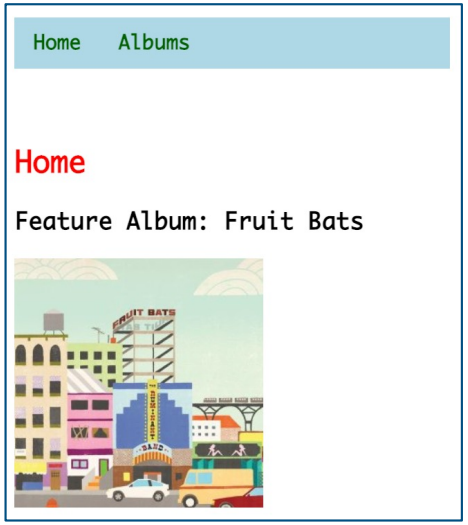

Group Challenge

- On this challenge, you are task to make the React app and route work.
- If you notice around the codes, there are numbered tasks assigned ie. task 1, task 2, etc. Follow these task numbers to complete the challenge.
- Like the demo exercise we just complete, the main focus of this challenge is the route. Refer to the demo as guidance.
- The architecture of this app is as follows: The App is the assembler of other components and outputs to the view. In it, contains two child components that it renders – nav and main. The main component in turn dictates which component to render/display - home or albums, based on interaction on the nav. The main component therefore will contain routes that matches the paths send from the nav and renders either the home or albums component.

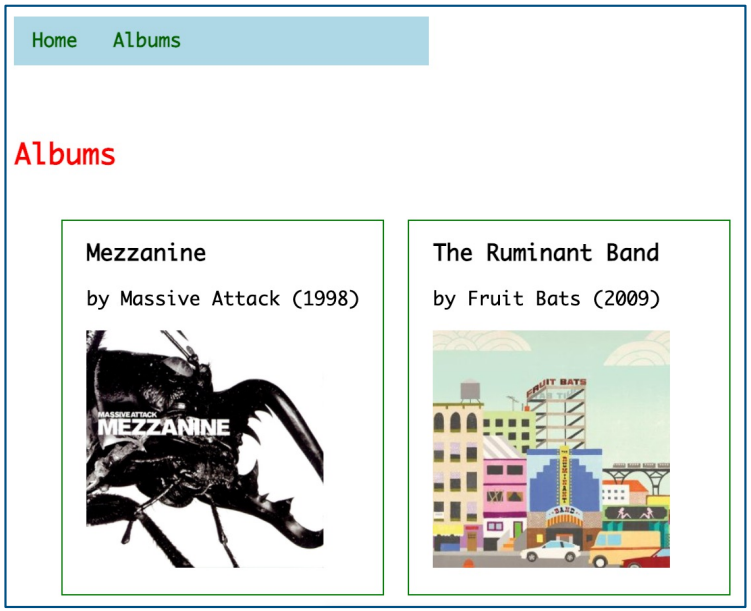

Group Challenge

- Here are snapshots of the interactions:

When first load/after home is clicked on the nav

After Albums is clicked on the nav

Group Challenge

- Each group to share their solutions using share screen.
- Show your codes on Codepen.
- Presenter:

  Explain your approach including code concepts used.
